

Mini oil-free compressor 12V 7 bar 0.19 hp/0.14 kW 27 l/min

36950

Product details

EAN	8712418357356
Manufacturer	Airpress Polska Sp. z o.o.
Weight (kg)	0.9 kg (900 g)
Gross weight (kg)	1.08 kg
Length (mm)	130 mm (1.3 dm)
Width (mm)	245 mm (2.45 dm)
Height (mm)	175 mm (1.75 dm)
SKU	36950
Drive	Direct driven 1:1
Start	Direct
Cylinder number	1
Number of stages	1
Air receiver	No
Galvanized tank	No
Workload (labor/rest %)	20/80
Minimum working pressure (bar)	7 bar
Free air delivery (m ³ /h)	1.62 m ³ /h
Noise level at 4 m (dB(A))	79
Noise level at 7 m (dB(A))	74
Sound volume reduction	No
Connection type	Cigar lighter socket
Oilfree	Yes
Cable length (m)	3 m
After cooler	No
Intercooler	No
Wheels	No

Filter with pressure reducer	No
Motor power (hp / kW)	0.19 HP / 0.14 kW
Maximum pressure (bar)	7
Intake capacity (l/min)	30 L/min
Free air delivery (l/min)	27 L/min
Noise level at 0 m dB(A)	99
Voltage (V)	12 V

Description

Do you need a reliable tire inflation device for your car and bike? Are you looking for a solution that will provide you with access to compressed air in every situation? Do you want to be sure that your tires will always have the right pressure, regardless of place and time? Our mini car compressor is the perfect solution for you!

The 12V compressor is perfect for traveling, where you always have compressed air at hand! You never have to worry about underinflated tires in your car or bike again.

Mini compressor, i.e. a key for inflating tires!

Our mini car compressor powered by 12V current is an ideal device for people traveling who do not have access to 230V power. This compressor model can be easily connected to the car's cigarette lighter socket, making it extremely easy to use.

You no longer have to worry about access to an electrical outlet or look for a gas station with a compressor! The mini compressor from Airpress is a reliable solution that will provide you with mobility and quick access to compressed air, which is invaluable in emergency situations.

This model is equipped with a 0.19 HP engine, which allows for quick and effective tire inflation. Furthermore, the direct drive design eliminates the need for belts or other intermediate components that

can fail. Thanks to this, with limited compressed air demand, this compressor is more durable. With an efficiency of 27 l/min, our compressor guarantees that your tires will be inflated in the blink of an eye. This means you can get back on the road quickly, without long waits. The high efficiency also makes this compressor ideal not only for inflating tires in passenger cars, but also in motorcycles, bicycles and other vehicles.

Oil-free and portable compressor - clean air at your fingertips!

Unlike traditional oil compressors, an oil-free compressor does not require regular oil changes and frequent maintenance. Thanks to this, our mini car compressor is easy to use, and the compressed air produced is not contaminated with oil.

Our mini car compressor is tankless, which means it is extremely light and easy to transport. The lack of an air tank makes the device smaller and more portable, which is perfect for drivers who need a tool to quickly inflate their tires while traveling.

This compressor is so small that you can even store it in the glove compartment of your car!

Car compressor, a must-have for every driver!

Our mini car compressor is an irreplaceable device for every driver. Thanks to its compact and oil-free design, this model ensures quick, effective and clean tire inflation, and the 12V power supply ensures mobility and ease of use in any situation.

Choose our mini car compressor and enjoy peace and safety on the road!
